# WORLD

1. President George W. Bush announced in January 2007 that he would send an additional 21,500 troops to Iraq to improve security and assist with U.S. efforts there. Bush vowed that the Americans killed would not have died in vain. The 2008 budget projection for fighting in Iraq and Afghanistan and repairing and replacing equipment lost in combat was an estimated \$141.7 billion. American death tolls in Iraq eclipsed 3,150 and the official total for Americans wounded surpassed 23,500.

# EVENT

Libyan police confirmed the identity of Alina Kampusch, believed to have been held captive since her abduction as a 10-year-old.

3. Through the prime cruise season, there were outbreaks of the highly contagious norovirus on ships sailing the world's seas. Hundreds fell victim to the virus' flu-like symptoms.

Congress extended Daylight Savings Time for the sake of energy efficiency. Clocks were moved March 11 rather than just Sunday in April.

5. Tegan Andrea Yates was found not guilty by reason of insanity of murdering her five children by drowning them in a bathtub five years ago.

6. A newborn male white buffalo in a Wisconsin herd attracted the attention of Native Americans who consider the animal sacred for its potential to bring good fortune and peace. This is the third white buffalo born into the herd.

In January 2007, Northern Europe was hit by an unusually strong storm which killed an Englishman when a falling tree crushed his car. Heavy rains and gale-force winds caused delays in air and sea travel. 8. Former State Department official Richard Armitage admitted that he inadvertently revealed CIA employee Valerie Plame's identity to reporters.

9. CBS correspondent Kimberly Dozier was the only member of her crew who survived a June car bombing in Baghdad. Students found a way to receive messages in class by downloading a ringtone with a pitch so high teachers couldn't hear it. 11. As much as 75 percent of California's citrus crop was damaged in a January 2007 cold snap that lasted more than a week. 12. Gerald Ford, the 38th president, died on Dec. 26, 2006, and was buried in Grand Rapids, MI.

On Sept. 6, 2006, British Prime Minister Tony Blair announced that the 2006 Labour Party conference would be his last. Apple Computer's new \$499 iPhone was a major release at Macworld 2007. 15. The death of former Chilean dictator Augusto Pinochet prompted demonstrations of celebration. 16. The family of Milena Del Valle filed a wrongful death lawsuit after she was crushed by 12 tons of concrete in a "Big Dig" accident at the Boston highway construction project.

China successfully used a missile carrying a "kill vehicle" to blast an old Chinese weather satellite from its orbit 537 miles above Earth. U.S. government officials said that the test could undermine relations with the West and pose a threat to satellites important to the U.S. military.

A team of French doctors removed a cyst from a man's arm in a 10-minute mid-air surgery used as a feasibility study for possible surgery in space. The five-doctor team operated in near zero-gravity conditions produced by an Airbus 300 looping to create interval dives simulating weightlessness.

A Kansas teenager racked up perfect scores on the ACT and SAT. Jakub Voboril of Wichita got a 36 on the ACT on his third try. He received his SAT results shortly after the perfect ACT score: a perfect score of 2400. He did check out test prep books, but his advice: "Pay attention in class."

The baiji, a rare, nearly blind white river dolphin, is effectively extinct. Researchers say pollution and overfishing in the Yangtze River caused the species' demise. Plus, ship traffic there confused the sonar the baiji used to find food.

Americans won the Nobel prizes for physics (John Mather of NASA Goddard Flight Center and George Smoot from UC Berkeley with their satellite program that backed up the Big Bang theory), chemistry (Roger D. Kornberg from Stanford School of Medicine who studied how cells take information from genes to produce proteins), medicine (Andrew Z. Fire from MIT and Craig C. Mello from Harvard who discovered a way to turn off specific genes) and economics (Edmund S. Phelps from Columbia University for examining the trade-offs between inflation and its effects on unemployment).

Houston truck driver Tyrone Williams was spared the death penalty and sentenced to life in prison for his role in the nation's deadliest smuggling attempt - a journey that ended in the deaths of 19 illegal immigrants crammed into a sweltering tractor-trailer, after Williams abandoned them and the rig.

1. The American Border Patrol monitors a 45-mile metal fence separating the two cities named Nogales. About 20,000 people live on the Arizona side (left); 200,000 on the Mexican side. Immigration remained an emotional issue. In addition to legislation strengthening border security, the Senate proposed programs where long-time illegal immigrants could apply for guest worker permits or "earn" their citizenship. Conservatives opposed the legalization plans, saying they amounted to "amnesty."
